

#### **SIF NETWORK DIAGRAM**

09/06/2009

#### *Configuration Notes:*

Network Address: 192.168.11.0  
Subnet Mask: 255.255.255.0  
Gateway: 192.168.11.254  
Primary DNS: 83.146.21.6 (BT)  
Secondary DNS: 212.158.249.5 (BT)

DHCP is served by THOR server only. Only THOR and the network hardware have static addresses, all other servers and PCs have dynamic addresses.

Routeing between SIF LAN and TXSNET is via Cisco router. The default gateways on each LAN have static routes that point to this router.

THOR Server is running Apache, MySQL etc and is main server for system.

Admin, Root password is usual one!
